

SupportFlow Design Frames & System

This document combines the design system with representative interface frames for the SupportFlow builder so it can be reviewed as both a visual language and a full-screen product experience.

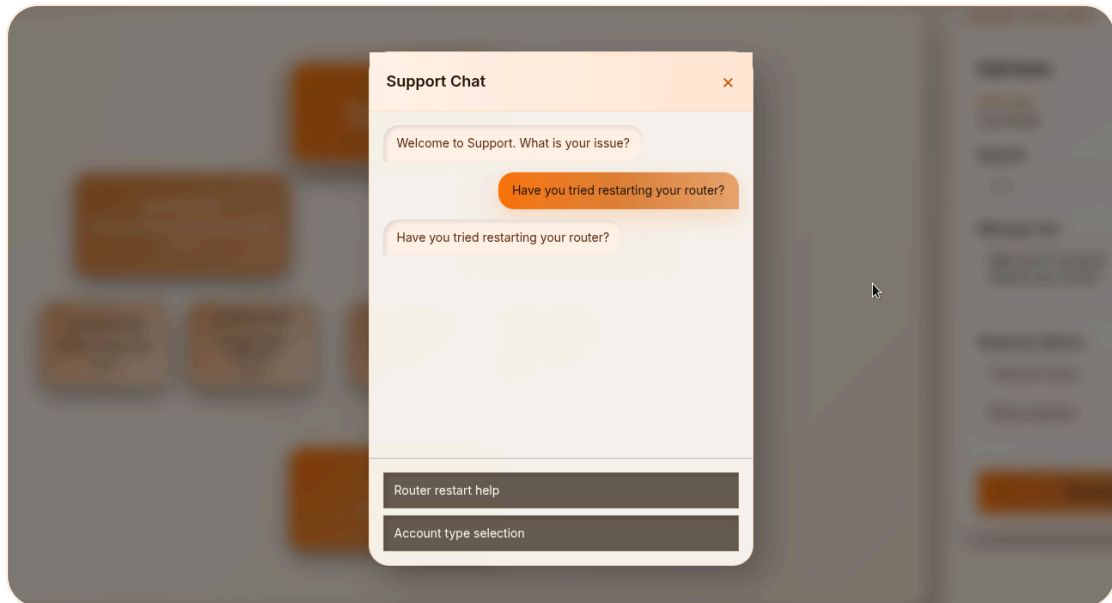

1. Interface Screens

Screen 1 — Light Mode Builder Workspace

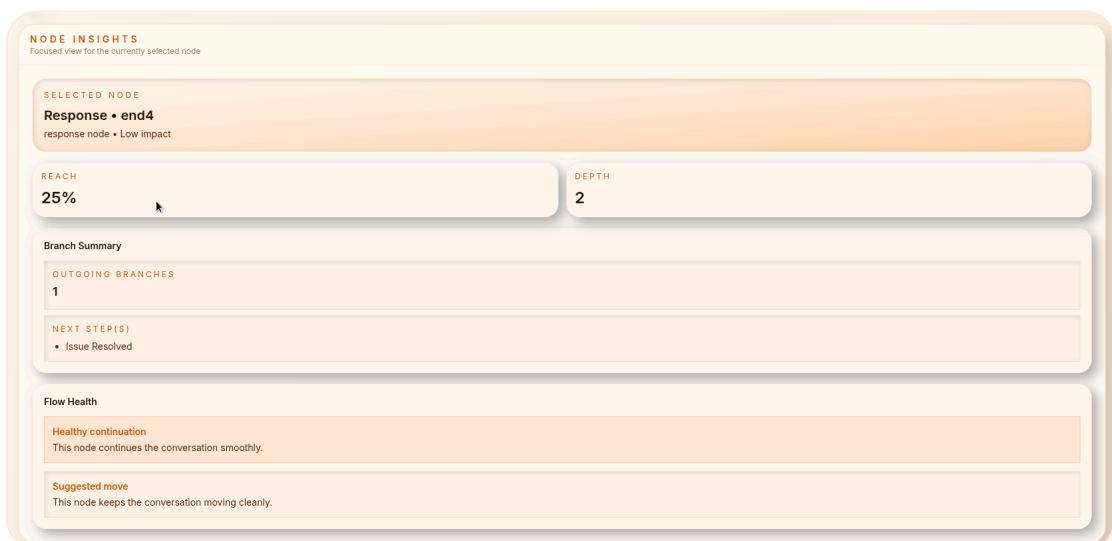

The light-mode workspace shows the builder canvas, header, and editor surface in a warm, readable layout.

Screen 2 — Light Mode Conversation Preview

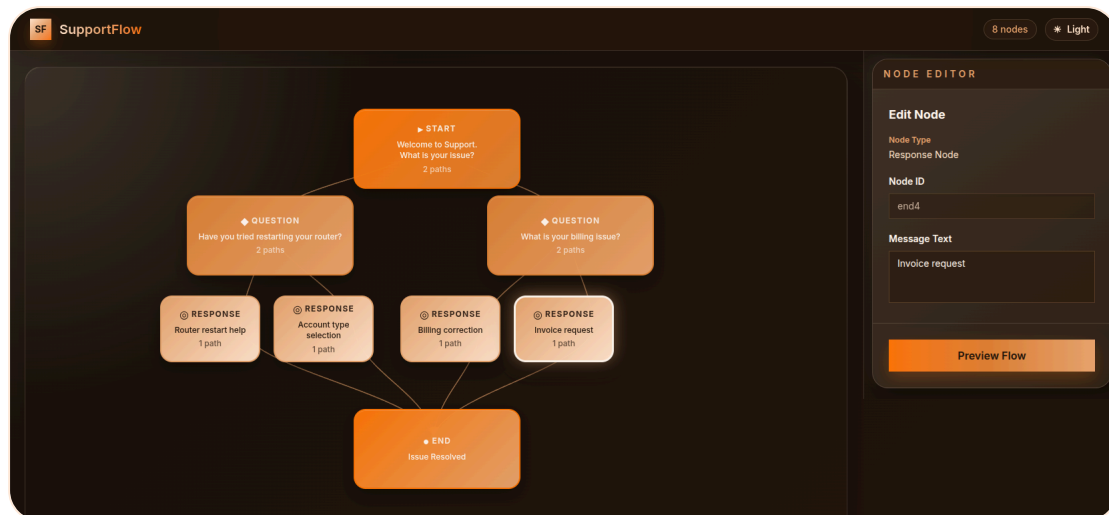

The light conversation preview shows the same experience in a softer, more accessible presentation.

Screen 3 — Light Mode Insights View

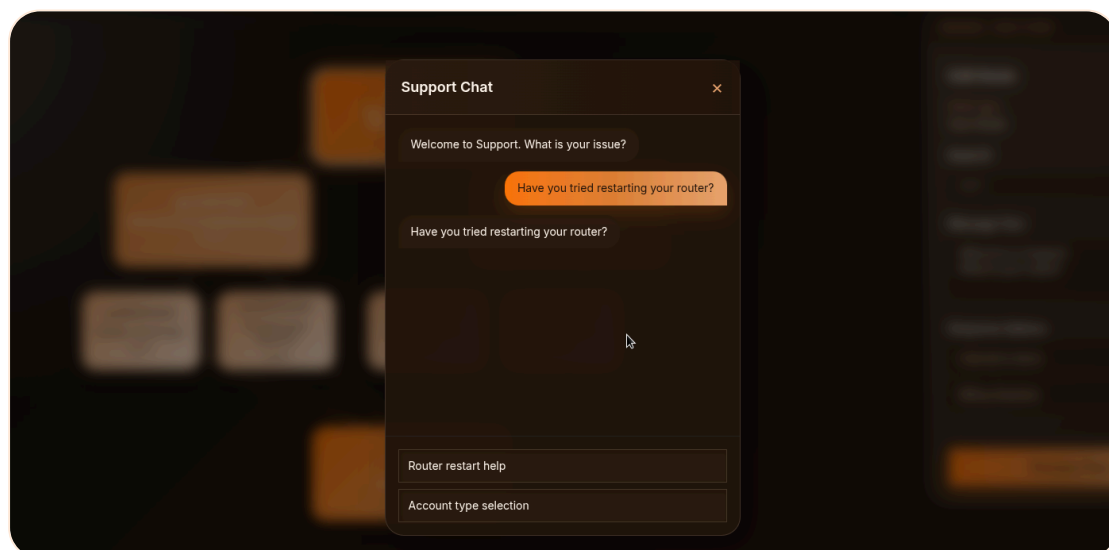

The insights view highlights flow health, branching, and the value of the wildcard logic in a clear dashboard format.

Screen 4 — Dark Mode Builder Workspace

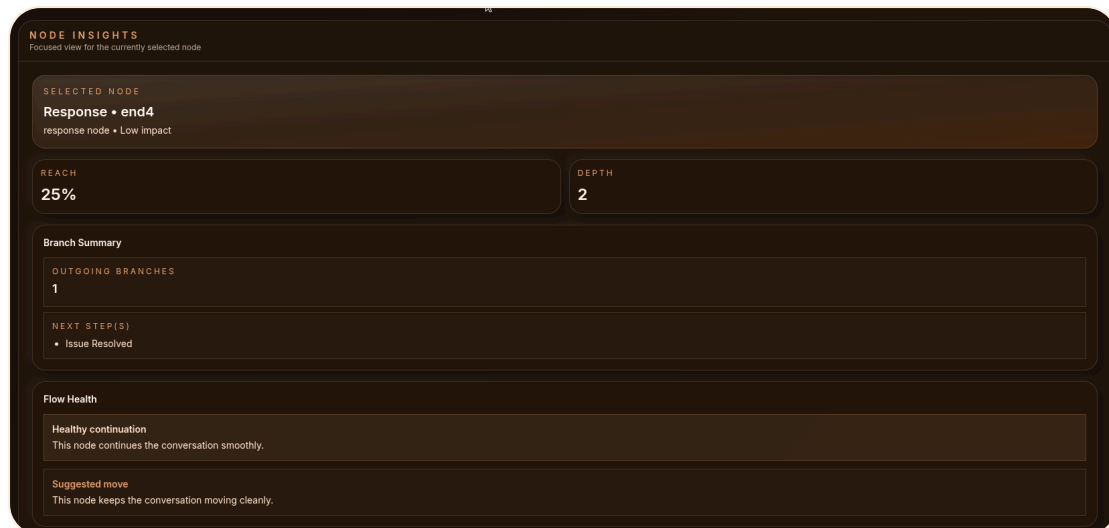

The dark-mode workspace preserves the same structure while using a deeper, more premium surface treatment.

Screen 5 — Dark Mode Conversation Preview

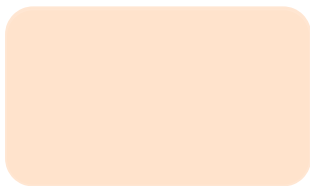

The dark conversation preview demonstrates how the chat experience feels in the evening theme.

Screen 6 — Dark Mode Insights View

The dark insights view carries the same intelligence layer into the darker visual system.

2. Design System

Soft Cream

#ffe3cc

For light surfaces, soft highlights, and gentle contrast.

Warm Sand

#e7a46e

For supporting accents and approachable emphasis.

Amber

#dd8136

For active states and interactive highlights.

Primary Orange

#fb7507

Used for key actions, node

Surface Panel

#23160d

For elevated cards, side panels, and the main app shell.

Deep Background

#17110b

For the full app background and deeper contrast.

states, and focal moments.

3. Product Principles

01

Clarity

Every interaction is easy to understand and visually structured.

02

Warmth

The orange palette feels premium, energetic, and approachable.

03

Confidence

Rounded surfaces and polished hierarchy reinforce trust.
